### Risk Indicator<sup>2</sup>

Lower risk Higher risk

### Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Debt instruments are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the redemption date. Changes in interest rates will result in fluctuations in the value of the fund. The fund uses derivatives (complex instruments) for investment purposes, which may result in the fund being significantly leveraged and may result in large fluctuations in the value of the fund. The Fund may invest in a dynamic way across assets/asset classes, which may result in periodic changes in the risk profile, underperformance and/or higher transaction costs. The fund may invest in distressed securities which carry a significant risk of capital loss. As a large portion of the fund is invested in less developed countries, you should be prepared to accept significantly large fluctuations in the value of the fund. The fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events. The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund. Investments in debt instruments which are of lower credit quality may result in large fluctuations in the value of the fund.

### Fund Strategy

The fund aims to generate income and long term capital appreciation from investment in Asia-Pacific equities and debt securities (excluding Japan). Our approach to asset allocation is flexible and, based on a clearly defined investment process and risk overlay, aims to reduce downward risks and volatility (although this is not guaranteed). Within equities, we look for companies with sustainable value and competitive advantages. Within fixed income, we aim to maintain a diversified and high-quality portfolio that helps generate income.

**Past performance does not predict future returns.** The performance period shown here starts on the last day of the first indicated month and ends on the last day of the last indicated month.

### Cumulative performance\*
